Innovation. Vision. Dedication.

The York Analytical Legacy

York Analytical has been at the forefront of environmental analysis throughout the Greater New York region since the early 1980s, with roots in air monitoring that predate the U.S. Environmental Protection Agency. Independent and owner-operated, York has worked on countless high profile and complex projects for more than three decades in an always-changing environmental industry.

York's senior scientific and technical experts have long recognized upcoming environmental issues, adapted quickly to new guidelines and regulations, and innovated new methodologies and testing that are industry standards.

York empowers clients to better serve their customers with project planning insights, expert technical responsiveness, and fast turnaround times.

We provide the entire continuum of expert testing and analysis of air, wastewater, drinking water, stormwater, soil, solids, and hazardous waste for volatiles, semi-volatiles, pesticides, herbicides, PFAS, PCBs, metals and other environmental regulated parameters.

Water Analysis

Soil Analysis

In 2019, York Analytical opened NYC's first and only PFAS laboratory to analyze PFAS in soil, groundwater, wastewater and drinking water. In January 2023, York added a second PFAS laboratory to handle the demand for advanced PFAS testing and analysis in the tri-state region.

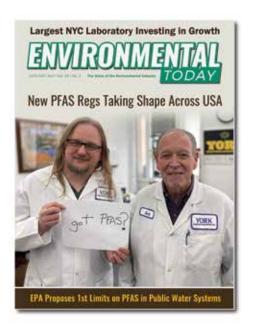

Environmental professionals rely on York Analytical Laboratories for its dedication to innovation, anticipating the needs of its clients, and delivering accurate and on-time data.

Unmatched PFAS Expertise

n 2019, York Analytical Laboratories opened NYC's first and only PFAS laboratory to analyze PFAS in soil, groundwater, wastewater and drinking water.

As new state and federal regulations and guidelines are enacted for PFAS, York will remain the premiere laboratory for expert PFAS analysis and technical support, with continuous investing in instrumentation, people and systems.

Homeowner Drinking Water Testing

"WHAT'S REALLY IN MY WATER?"

every week, new reports detail the extent of contamination in our drinking water from PFAS ("forever chemicals"). To address the growing crisis, York offers comprehensive drinking water testing services in Connecticut, New York and New Jersey.

York provides fast, expert testing and analysis of drinking water supplies from residential, municipal, commercial, and utilities.

Visit www.YorkLabWaterTest.com or www.DrinkingWaterTesting.com to find out if your water is safe to drink.
